

AT A GLANCE

# Deltek Consulting Overview

Enterprise applications need to grow and evolve as your business changes. The best are adaptive and flexible enough to change with you. At Deltek Consulting, we want to provide you with the tools and information that puts you in a position to adapt and take advantage of new opportunities, in order to continue growing your business.

Deltek Consulting helps customers solve complex business issues with a combination of technology, business application and training services that leverage Deltek's deep project-focused business expertise. Deltek helps you assess your business needs and develop a comprehensive strategy for your project-based enterprise software that improves the value of your investment in Deltek software.

## TECHNOLOGY CONSULTING SERVICES

Deltek Consulting Technology Services go beyond implementation and upgrade services of other enterprise application providers. Combining our expertise in project-based business with our deep knowledge of Deltek technology, we provide the skilled consulting resources and technologists to optimize your technology architecture, maintain an effective data migration and quality strategy, integrate disparate applications into a unified system, leverage the latest products from Deltek and its partners, and customize applications to your specific business requirements.

Deltek Consulting Technology Services include:

- **Implementations and Upgrades** – Deltek's proven and efficient implementation methodologies - refined from thousands of successful implementations – provide customers with streamlined implementations and upgrades.
- **Architecture Assessments** – A complete assessment of your hardware, database, and networking requirements, including recommendations for optimal solutions.
- **Data Migration Consulting** – Advice for developing and executing your data migration strategy, plans, and testing solutions.

- **Integration & Customization** – Leverage our expertise integrating Deltek products with various technologies to assist you in integrating the right technology that optimizes your Deltek application.

## BUSINESS APPLICATION SERVICES

Project-focused organizations are unique and often operate with little margin for error. Deltek Consulting Business Application Services taps the deepest level of project-focused expertise and examines customer's business processes, application usage, reporting and more. Customers benefit from improved reporting and information-sharing, increased and advanced user adoption, and streamlined operations.

Deltek Consulting Business Application Services include:

- **Business Productivity Assessments** – The ideal starting point for businesses that want to improve their internal processes without the disruption caused by a system overhaul. Our consultants work directly with you to evaluate all facets of your business and to make recommendations that streamline and optimize your operations.
- **Performance Management** – Maximize your success by ensuring that best practices are applied when implementing, expanding or upgrading your business intelligence analytics and reports that measure your firm's key performance indicators.
- **Project Management Outsourcing** – A dedicated Project Management team manages the interdependent time, costs, and scope of a project to successfully achieve agreed-upon project objectives.
